Respectfully submitted,

HARRY E. POOR,
GEO. LESTER LYNDE, } Auditors.

In making up the report for the school year ending July 31, 1903, we, as a school board, through a number of different teachers, have endeavored to give satisfaction to parents as well as at the same time giving the pupils the advantage of different methods.

As shown in our statistical table, twelve different teachers have been employed, four of these teaching their first term.

As shown by the registers of our schools, the attendance for the past year has been very irregular and therefore much of the school money has been wasted. Every one should know the cost of running a school for a dozen pupils is no more than for one. When will parents awaken to the importance of having their children attend as much as possible each and every session of the school and thereby get the benefit of the money which is expended. Of course some of the non-attendance has been due to unavoidable circumstances.

During the past year we have made some greatly needed changes in the school books, the old ones being in a sadly dilapidated condition and considerably behind the times. In buying new ones, we have, to our best judgment, introduced those which would meet the requirements of our pupils and would also bring our schools up to the present standard of schools. Among the new ones are Metcalf's Language Lessons, The American Word Book and a few of the new Wentworth's Elementary Arithmetics.

In the past year we have made many needed repairs on the different school houses and have tried to use the money allowed us as judiciously as possible. There is, however, a chance of more improvement, but we hope they now present a more respectable appearance than before.

The bill for carrying scholars from Whitecherville to South Landaff was much more than has been paid in previous years for such purposes, but we were unable to find any person who would carry them for less money.

We think the schools have all run quite smoothly except for a little disturbance at the Blue school house last June. We

felt it our duty not to let the matter pass unnoticed as it was brought to our notice. A small sum was charged for damages done, which was paid by C. E. Heath and E. W. Kay. Two dollars was paid by Mr. Heath to Mr. Holmes for damages to lamp; the remainder was paid into the treasury for general school purposes.

In closing, we wish parents would bring their authority to bear with us in making their children attend school more regularly, and thus bring our reports up to a better standing. Parents cannot expect the school board to continually harp the children to attend school. They should each and every one endeavor to have their children like their school and teacher. At least once during the term step in and see what your child is doing in the school room. It will please both teacher and pupil and take very little of your own time. We hope that in the year to come you will aid us in our work that our registers of schools may present a more pleasing appearance than heretofore.
